Dashboard – Tablet (Admin)

Responsive Notes

- The sidebar navigation collapses into a horizontal navigation bar to optimise space on tablet screens.
- Navigation items are shortened to maintain readability while still providing access to the main administrative sections.
- The dashboard card grid reduces to a single column so that system information remains clear and readable on smaller screens.
- Cards maintain the same content as the desktop version but are stacked vertically to better utilise the available screen width.
- Notification and user icons remain in the header to provide quick access to alerts and account options.

Dashboard – Mobile (Admin)

Responsive Notes

- Navigation moves into a hamburger menu so the interface can conserve space and keep the main content readable on smaller screens.
- Dashboard cards stack vertically to ensure that information remains readable without requiring horizontal scrolling.
- The page scrolls vertically to allow administrators to review system overview information including items, contracts, watch activity, and guild member statistics.
- Header icons for notifications and user profile remain accessible to maintain consistent access to alerts and account options.
