Functional Notes

- Displays a list of items available for reservation.
- Users can search for items and filter them by category or availability.
- Each item is shown as a card with the item name, category, price, and status.
- Available items can be reserved directly from the list.
- When a user reserves an item, they receive a reservation number along with instructions to pay and collect the item from the guild.
- Unavailable items can be added to the watchlist so users can track when they become available.
